# THE TECH FACTOR

LEARN ABOUT THE MATERIAL, FOAM AND TEXTURE TECHNOLOGIES THAT SET WILSON PADDLES APART FROM THE COMPETITION.

## MATERIAL

### DOUBLE CARBON WALL

Innovative carbon construction that maximizes the “trampoline effect” of the paddle face for greater flexibility and faster snap-back properties, generating significantly more power than a single wall construction.

### CARBON FIBER FACE

A strategically woven layer of carbon fiber gives the player the ability to hit with ultimate power.

### BRAIDED GRAPHITE

Braided Graphite® provides a pure, solid and consistent feel that experienced players crave. This strong construction also dampens vibrations and enhances touch and control.

### CARBON FIBERGLASS COMPOSITE

Blend of carbon and woven fiberglass contributes lightweight feel and produces greater power than fiberglass paddles.

### FIBERGLASS WEAVE

Fiberglass frame construction supplies nice mix of stability and paddle responsiveness.

## FOAM

### SMART FOAM

Smart Density Foam packs two distinct EVA foam densities within one paddle. With a layer of high density foam in the middle and two layers of lower density foam on top and bottom, the paddle responds to the speed of the ball upon contact with the paddle face. This gives players the ability to either generate more power with extra firmness or add touch with a cushioned feel when needed.

### PRECISION FOAM

The highest density foam in the game today, this firm core produces solid, crisp shots for quicker ball deflection and excellent control. Ideal for intermediate to advanced players who feel comfortable operating at a quick pace with less margin for error.

### POWER FOAM

Produces the most responsive paddle shots at a reduced weight. Offering a cushioned feel with impressive shock absorption, this softer foam makes it easier than ever to maneuver and swing with lightweight power.

### CORE FOAM

Small density white foam provides more stable performance while retaining a soft, comfortable feel.

## TEXTURE

### TRI-HEX GRIP

A unique texture that induces added ball rotation and spin upon contact with the paddle surface.

### OPTI-GRIP

Similar to a basketball, this uniform pebbled pattern on the surface optimizes ball grip for added control on high-powered, aggressive shots.

### SHARP HOLE TECHNOLOGY

Advanced hole-drilling process produces increased bite with every stroke.

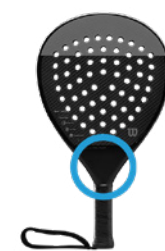

# ULTRA™

Innovative material and geometry technologies raise the ceiling for booming power and optimize the paddle surface area.

## ULTRA SWEET SPOT

Diamond shape creates wider sweet spot higher up on paddle face. Revolutionary Infinity Edge design features concave edge to maximize sweet spot and increase playing surface.

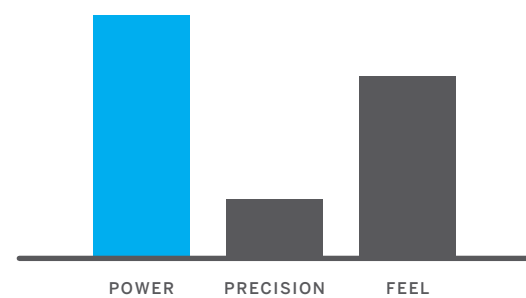

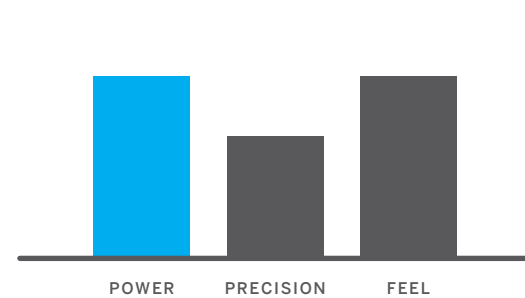

## YOKELESS DESIGN

Yokeless design adds forgiveness and boost of power with cleaner feedback that connects to the grip.

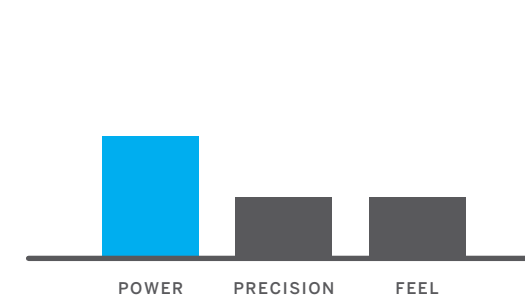

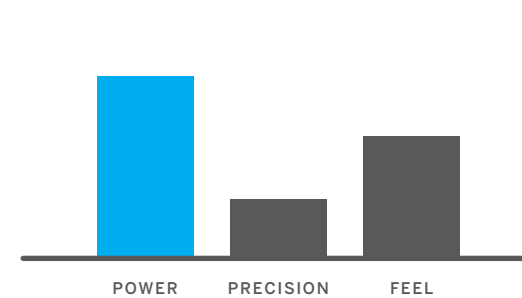

## ULTRA TOUR

## ULTRA

## ULTRA ELITE

## ULTRA TEAM

# PRO STAFF®

Reinvents a classic by raising the bar for ultimate control and precision with a strong surface construction and smaller head size.

## PRO STAFF SWEET SPOT

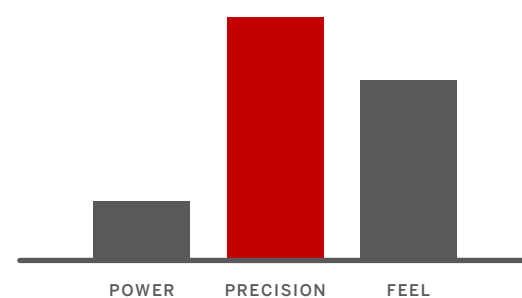

Round shape provides sweet spot in center of paddle to optimize creativity with short angles and precise ball placement.

## INNOVATIONS

### UPPER TECHNOLOGIES

#### AMPLIFEEL™

Adds increased upper support for feel, control and explosive lateral acceleration.

#### ENDOFIT® COMFORT+

Full inner bootie construction provides the ultimate in comfort, stability, and feel with an overall intuitive fit experience.

#### ENDOFIT®

Inner sleeve construction provides enhanced comfort, stability, and an intuitive fit experience.

#### SYMBIOFIT™

Bootie and lateral webbings in an upper construction to generate best-in-class comfort and support.

#### sensiFEEL 2.0

#### SENSIFEEL™ 2.0

A minimally layered upper with an engineered mesh that provides enhanced breathability, feel, support, comfort, and a homogeneous fit.

#### SENSIFEEL™

A minimally layered upper upgrades comfort while maintaining superior support.

#### SKINGUARD™

Upper protection for durability. Forefoot and lateral reinforcement to enhance support during lateral movements and push-offs.

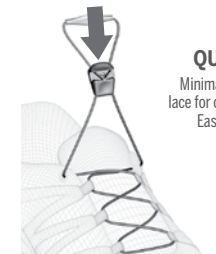

#### FOREFOOT SUPPORT

**3D-FS™** – TPU strategically placed in the forefoot and extended to the heel provides unparalleled stability and increased response time - explosive acceleration with controlled deceleration.

**2D-FS™** – PU strategically placed in the forefoot provides lateral stability with enhanced responsiveness.

**FS™** – Forefoot overlay for overall support.

#### QUICKLACE

Minimalistic and strong lace for one-pull tightening. Easy-on, easy-off.

### MIDSOLE/OUTSOLE TECHNOLOGIES

#### 4D SUPPORT CHASSIS

An asymmetrical heel-to-toe chassis that delivers enhanced stability and limits supination / torsion to help control pivot movements while setting up for powerful strokes.

#### PRO TORQUE CHASSIS (PTC) LIGHT

Arch technology is built for speed by providing ultimate stability and flexibility.

#### PRO TORQUE CHASSIS (PTC)

Arch technology that provides torsion control and stability for explosive acceleration.

#### DYNAMIC FIT

**DF1** – Heel-to-toe drop 6mm. Low-to-the-ground court feel, dynamic comfort, agility.

**DF2** – Heel-to-toe drop 9mm. Cushioned court feel and quick reaction.

**DF3** – Heel-to-toe drop 12mm. All-around court feel and cushioning.

#### R-dst+™ / R-dst™

#### MIDSOLE

**R-DST+™** – Best combination of cushioning and rebound for more dynamic performance.

**R-DST™** – Augments cushioning and rebound for comfort and responsiveness.

#### DURALAST™

Exclusive high-density, consummately durable rubber compound provides super abrasion resistance and maximum traction on all surfaces.

#### WSS

Assymetrical heel counter for enhanced foot support. Reduced rubber thickness on outsole eases propulsion. Lower EVA density (52) to improve comfort and agility.

#### SOLE VARIATIONS
