INNOVATIONS

FORTYFIVE°

Patent-protected lay-up produces a more connected-to-the-ball feel while better complementing the modern, vertical swing path. Material increases both flexibility and stability without compromise through the swing.

DIRECTCONNECT

Carbon fiber handle extends to connect directly to end cap for improved feel and enhanced torsional stability.

BRAID 45

This update to the classic Pro Staff Graphite and Kevlar braid arranges the braid fibers at 45 degree angles, allowing the braid to “breathe” more upon impact. The result is an enhanced pocketing feel combined with incredible stability.

POWER**PROFILE™**

Encompasses three geometrical enhancements designed to boost stability and generate easy power off the strings.

Blends the volume of the current PWS over a larger area to open up the string bed, delivering more power while maintaining stability.

Cavity on the inside of the frame extends the cross strings for more power and responsiveness off the string bed.

Inverted rib in the throat area increases torsional stability for easier power and reduced frame twisting.

SPIN EFFECT®

Patented Spin Effect Technology is the first racket system that actually increases ball RPM without players changing their swing. The net seems lower and the court feels longer on all your shots.

BRAIDED GRAPHITE + **BASALT®**

Braided Graphite Basalt is an elastic and reactive material combination that improves the flex of a racket. This evolution of Wilson's BLX® technology increases the ball's contact with the strings to provide enhanced feel and greater control.

HIGH PERFORMANCE CARBON FIBER

Developed for aggressive swings, this premium modulus carbon graphite provides increased frame stiffness for explosive power.

TRIAD

Three-piece Racket system where hoop and handle are separated with Iso-Zorb, providing the ultimate in comfort and soft feel.

PARALLEL DRILLING

Provides a consistent, more forgiving string bed response while dramatically increasing the sweet spot.

Spin Effect® Technology is a racket and string pattern innovation that increases ball spin. Pros often customize the racket they use. Racket specifications on endorsed consumer models may vary from the models used by Pros for match-play.

STRING AT A GLANCE

String performance depends on a number of factors: string type, gauge and tension. Take a look at how these factors generally impact popular performance traits.

STRING TYPE	CONSTRUCTION	SKILL LEVEL	POWER	CONTROL	COMFORT	SPIN	DURABILITY
NATURAL GUT	Individual strands of serosa fibers	All					
MULTIFILAMENT	String filaments wrapped with a PU binding agent	All					
MONOFILAMENT	Single, solid extrusion of polyester material	Medium/Advanced					
SYNTHETIC GUT	A Solid monofilament wrapped by smaller filaments	Recreational					

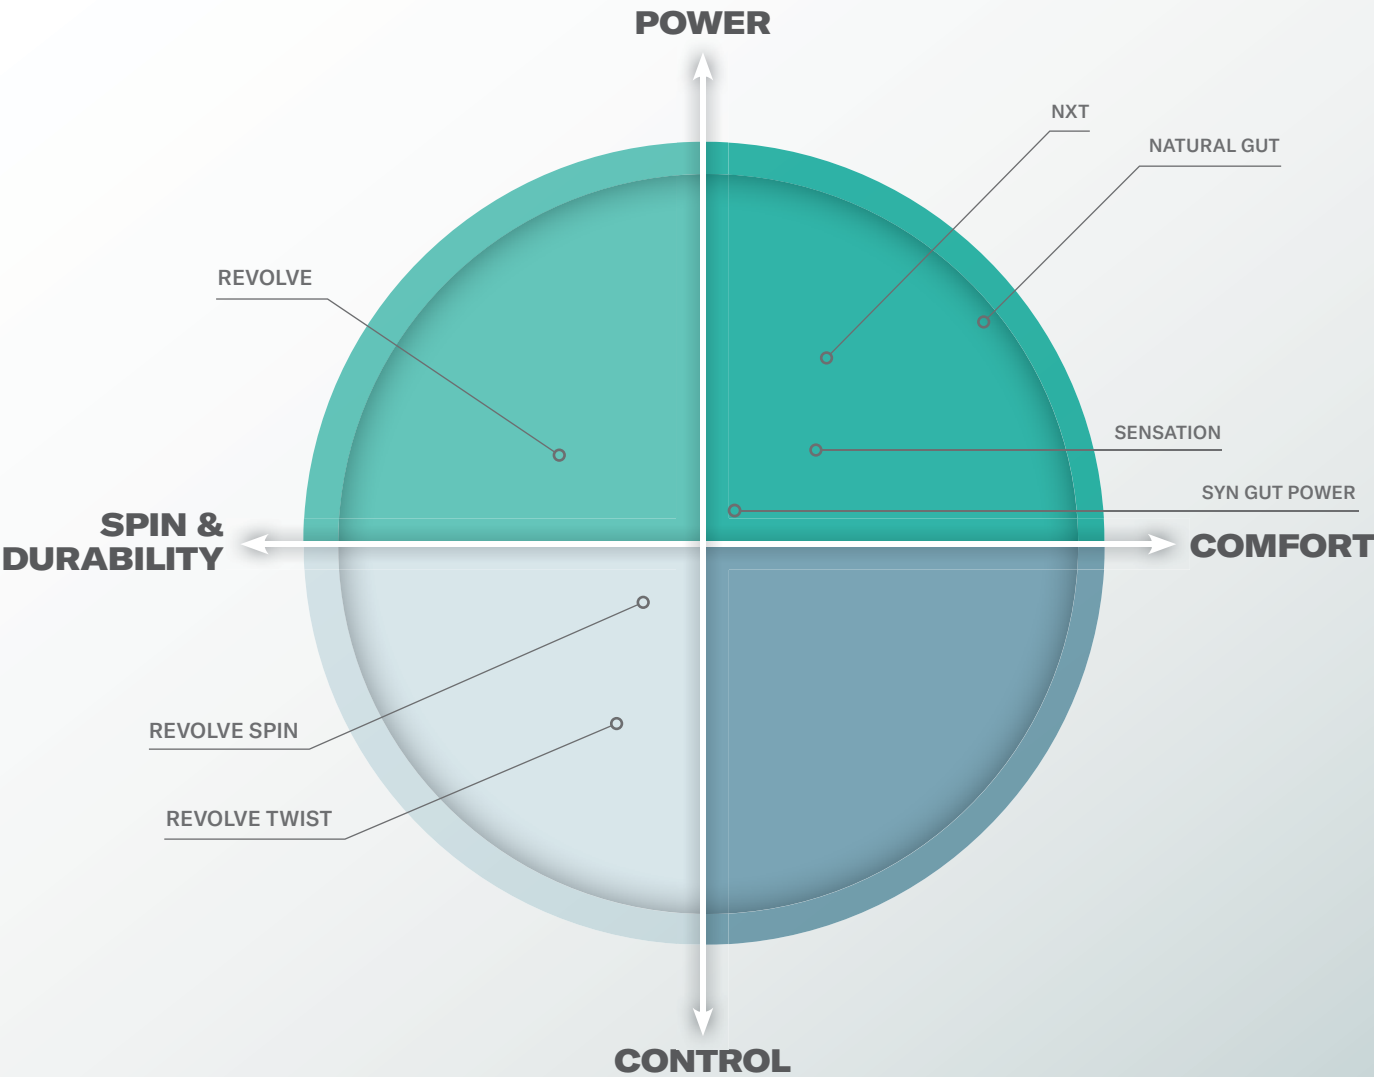

STRING CHARACTERISTICS

GAUGE	POWER	CONTROL	COMFORT	SPIN	DURABILITY
THINNER	+ POWER	— CONTROL	+ COMFORT	+ SPIN	— DURABILITY
THICKER	POWER	+ CONTROL	— COMFORT	— SPIN	+ DURABILITY

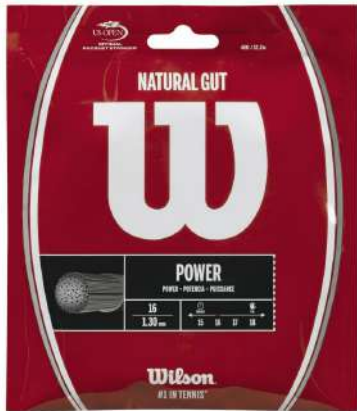

TENSION	POWER	CONTROL	COMFORT	SPIN	DURABILITY
LOWER	+ POWER	— CONTROL	+ COMFORT	SPIN	DURABILITY
HIGHER	— POWER	+ CONTROL	— COMFORT	SPIN	DURABILITY

Saving the planet is on the forefront of Wilson's mind when it comes to creating new products, and the new Luxilon Eco Power Tennis Strings do just that. This is the first ever string that is composed of 100% recycled materials. Not only is it great for the environment, but it is also great for bringing your game to the next level. The hexagonal shape grips into the ball, allowing easy access to spin. The thicker string is also ultra durable, and it offers great feel and forgiveness when hitting those delicate shots.

Key Features

- 100% recycled string composed of recycled PET bottles and packaging displays
- Hexagonal shape increases edges on the string, which offers more control and spin on each shot
- Durable, heavy duty features offers additional feel and forgiveness and increased life expectancy
- Great for players looking for control because of the firmness and feel the string has to offer

FOOTWEAR

POWER

NO COMPROMISES

Maximize your explosiveness with breathable outfits and stable footwear crafted for excellent range of motion and dynamic movement.

SPEED

NO LIMITS

Reach another gear with lightweight attire designed for no distractions or inhibitions as you go sideline to sideline.

INNOVATIONS

UPPER

ENDOFIT®

Inner sleeve construction provides enhanced comfort, stability, and an intuitive fit experience.

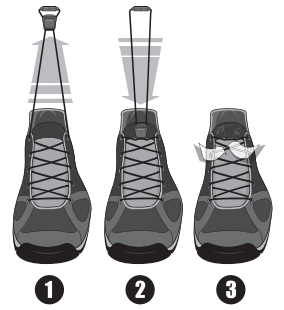

SENSIFEEL™ 2.0

A minimally layered upper with an engineered mesh that provides enhanced breathability, feel, support, comfort, and a homogeneous fit.

MEDIAL DRAG PADS

Rubber or TPU overlay(s) on the medial side supplies added durability and protection when dragging the foot.

QUICKLACE

Minimalistic and strong lace for one-pull tightening. Easy-on, easy-off.

MIDSOLE/OUTSOLE

4D SUPPORT CHASSIS™ 2.0

Split chassis extends the chassis under the foot to provide enhanced support and forward propulsion. Lateral piece runs from heel to toes for ultimate stability and control throughout dynamic movement.

ENERGY CELL

Lightweight EVA foam in forefoot of midsole lends softer feel for optimal transfer of body weight through impact, creating more explosive acceleration.

4D SUPPORT CHASSIS™

An asymmetrical heel-to-toe chassis that delivers enhanced stability and limits supination / torsion to help control pivot movements while setting up for powerful strokes.

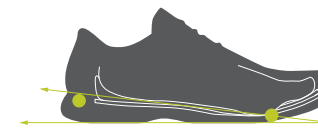

KAOS CHASSIS

A double chassis construction to enhance the natural foot movement via a flexible arch support for comfort & agility and a lateral support for torsional control & overall stability.

PRO TORQUE CHASSIS (PTC) LIGHT

Arch technology is built for speed by providing ultimate stability and flexibility.

DYNAMIC FIT

DF1: Heel-to-toe drop 6mm. Low-to-the-ground court feel, dynamic comfort, agility.

DF2™: Heel-to-toe drop 9mm. Cushioned court feel and quick reaction.

DF3: Heel-to-toe drop 12mm. All-around court feel and cushioning.

R-dst⁺ / R-dst™

MIDSOLE

R-DST™: Best combination of cushioning and rebound for more dynamic performance.

R-DST™: Augments cushioning and rebound for comfort and responsiveness.

DURALAST™

Exclusive high-density, consummately durable rubber compound provides super abrasion resistance and maximum traction on all surfaces.

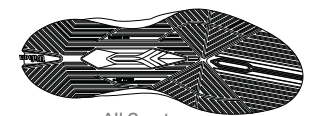

AUXILIARY

WSS

Asymmetrical heel counter for enhanced foot support. Reduced Rubber thickness on outsole eases propulsion. Lower EVA density (52) to improve comfort and agility.
